قابل احترام جناب چیئر مین اور ممبر آئل اینڈ گیس صاحب اوگرا

غیر قانونی طور پر ایل پی جی بوزر، سلنڈر اور والو بنانے والوں کے خلاف قانونی کارروائیاں عمل میں لائی جائے

جناب عالی گزارش ہے کہ میری اور اوگرا اتھارٹی نے موت کے سودا گروں (طاقتور لوگوں) کے خلاف 2006 سے اب تک بہت جدوجہد کی ہے اور قانون میں ترمیم کی جدوجہد پر میں آپ کا بے حد مشکور ہوں۔

جناب عالی ہماری درخواست مورخہ 6 جنوری 2024 پر مورخہ 17 جنوری 2025 بوقت 03:00 بجے ایل پی جی مینوفیکچر کی لاہور اوگرا آفس میں میٹنگ کا انعقاد کیا گیا ہے۔ ہم آپ کے بے حد مشکور ہیں۔ میں آپ کے علم میں یہ بات لانا چاہتا ہوں کہ اوگرا لائسنس یافتہ مینوفیکچر صرف ایک ہی لائسنس پر ایک فیکٹری پر کام کر سکتا ہے لیکن اوگرا کے لائسنس یافتہ مینوفیکچرز غیر معیاری ایل پی جی بوزر، سلنڈر بنانے کیلئے (شیخوپورہ روڈ، مانگا رائیوڈ روڈ، کراچی اور کوئٹہ) مختلف جگہوں پر موجود فیکٹریوں کیلئے ایک ہی لائسنس استعمال کر رہے ہیں۔ ایسے تمام مینوفیکچرز کے لائسنس منسوخ کیے جائیں جو کہ اپنا لائسنس غیر مجاز مینوفیکچر کو فروخت کرتے ہیں اور ان پر بھاری جرمانے عائد کیے جائیں۔ برائے مہربانی ان کے خلاف فوری کارروائی کی جائے۔

عرفان کھوکھر
چیئر مین

Respected,
Mr. Masroor Khan
Chairman (OGRA)
Oil & Gas Regulatory Authority
Islamabad, Pakistan.

Date: January 06, 2025
Ref # LPGIAP/25(i)/HQ-008

Subject: **ILLEGAL MANUFACTURING / MISUSE OF OGRA LICENSE. THERE IS A NEED TO CHECK ALL OGRA LICENSE HOLDERS & THEIR MANUFACTURING/REGISTERED SITE/S OF MANUFACTURING TOO, TO CONTROL THE ILLEGAL SALE OF THE LICENSE. THE AUTHORIZED MANUFACTURER WHO ARE SELLING THEIR LICENSE SHOULD BE REVOKED/CANCELLATION OF LICENSE ALONG WITH FINANCIAL PENALTY & IMPRISONMENT, AS IT IS VERY SENSITIVE MATTER AND INVOLVES PUBLIC LIFE SAFETY THREATS.**

Dear Sir,

We appreciate your efforts for the prosperity of poor people of Pakistan. We appreciate your bold decisions that you have taken in the past for prosperity of LPG Industry of Pakistan and for which, we are continuously growing under your leadership. We appreciate your government which have helped LPG Industry in maintaining supply chain of LPG throughout Pakistan and due to which, LPG had been available at economic rates to all LPG consumers of Pakistan. We stand with government of Pakistan and we also expect that Government of Pakistan will also help this industry in its survival.

Reference to the subject cited above, some unauthorized manufacturers are producing LPG storage equipment illegally and selling them in market. Also some authorized manufacturers are selling their licenses to unauthorized fabricators for the manufacturing of LPG Storage tanks and LPG Bowsers too and some manufacturers have more than one factories for the production of LPG Storage equipment but only one production site is getting audited by OGRA nominated parties. They are creating hurdles in the manufacturing field and lowering the quality standards set by the OGRA. The fabricator/manufacture, who purchased OGRA License/authorization against per job/Item, is/are attracting the customers by reducing in product prices but in reality, they are compromising on International standard, quality of materials, production methods/techniques, and NDT of product etc. Therefore, manufacturers who want to produce the quality products according to standard and best engineering practices, could not meet the market against those fake or item-wise manufacturers. As a result, either he will switch the field or for the sake of business, they will also reduce the price by overlooking quality and standard. So there is a need to check all license holders and their manufacturing/registered site/s of manufacturing too, to control the illegal sale of the license. All manufacturers should be allowed to utilize the license for only one production site or the audit of all factories operating under their license name should be audited.

To control or minimize the risk of accidents, OGRA should take prevention steps,

- Only ASME / PD5500 (BS Standard) / EN Standard etc. should be allowed for the manufacturing of LPG Vessels (Tanks, Bowsers & Cylinders), as per the OGRA authorized standards and guidelines and licensing authority (i.e. Explosive) should be advised to make sure it.
- Company/manufacture or fabricator without OGRA Approval should be punished legally or as per rules.
- The authorized manufacturer who are selling their license should be revoked/cancellation of license along with financial penalty and imprisonment, as it is very sensitive matter and involves public life safety threats.
- Involve local Govt. and authorities for the strictly implementation and monitor the rules. We will be available for further improvements and any other related work.

NOTE: As we already faced (8-10) casualties in case of cylinders blast due to substandard manufacturing, just imagine in case of LPG storage tank or LPG bowser it could be very dangerous, so this is very sensitive matter and should take it seriously.

Regards,

Irfan Khokhar
Founder/Chairman
LPG Industries Association of Pakistan
